FORMAL RESPONSE

Response to Prodally Development Proposal

Required SOW amendments, technology constraints, and Appendix A — Current Product Surface (preserve-and-extend).

Re: Mobile & Web App Development Proposal — scope alignment before engagement
Ref: Proposal received September 2026 · LingAfriq production app v1.6.2+330 (Flutter)

Dear Prodally team,

Thank you for the Development Proposal and for engaging with LingAfriq's strategic direction. We appreciate the clarity of your module pricing and the focus on freemium conversion, community retention, and an admin/monetization layer.

Before we can proceed to kickoff or deposit, we must align the Statement of Work with the **existing production codebase**. LingAfriq already operates a substantial Flutter application. Several items priced in Modules 1 and 2 are already implemented in whole or in part. Equally, major live product surfaces are not named in the proposal and would fall outside scope under page 11 as currently written.

> **Position**
> We are not accepting the proposal PDF as the binding SOW in its current form. We invite a revised proposal that adopts the mandatory conditions and Appendix A below. We remain open to collaborating—particularly on Admin Console, institutional licensing, and true net-new marketplace capabilities—on terms that protect continuity of the live product.

1. Mandatory conditions for a revised SOW

1.1 Technology continuity — Flutter

The member mobile application must be extended in the **existing Flutter repository**. The proposal's staffing of React Native is not acceptable for the production member app. Any React Native or separate-client rewrite would require an explicitly separate engagement, migration plan, dual-running strategy, and budget. Admin Console work in React is acceptable for the web console only.

1.2 Preserve-and-extend obligation

Replace the page-11 formulation that excludes unlisted screens by default. The revised SOW must state that Vendor shall **preserve and extend all Appendix A features** unless LingAfriq explicitly defers a feature in writing. Deferred items may be scheduled later; undeclared omissions are not an acceptable definition of done.

1.3 No silent rebuild billing

Where Module 1/2 line items overlap existing capabilities (translation, pronunciation, dictionary/Phrase DNA, AI coaching, live classroom, villages/tribes chat, offline, UGC, retention), the SOW must describe work as **audit, harden, upgrade, and integrate**—not as greenfield invention—unless LingAfriq authorizes a rewrite of a specific

subsystem.

1.4 Acceptance criteria

Delivery acceptance must include regression verification against:

- Named routes and primary drawer destinations in the Flutter app
- All entries in the games catalog (currently 42 types)
- Polie mode surfaces and LiveKit classroom/practice flows
- Existing chat/social entry points listed in Appendix A
- Offline download/sync paths, RevenueCat subscription surfaces, and monitoring/security hooks already present

1.5 Clarify contradictions

- **Telco/CSR:** either include with priced milestones or explicitly remove from marketing/overview language.
- **Learner Web App:** confirm in or out. Today only the Admin React console is clearly scoped.
- **Human tutor marketplace:** treat as net-new; define API contracts against existing backend.
- **AI vendors:** integration role is fine; model selection remains LingAfriq-owned as you noted—ensure this does not zero out existing hybrid provider wiring without approval.

2. Preferred commercial structure

Please reprice and rephase as three explicit workstreams:

- **Workstream A — Flutter mobile continuity:** harden and extend Appendix A surfaces; premium packaging/paywalls; quality/regression.
- **Workstream B — Admin & Content Console:** curriculum ops, moderation, RBAC, subscription/revenue/AI-cost dashboards, integrated with admin.lingafriq.com / existing APIs.
- **Workstream C — Net-new growth:** tutor/immersion marketplace booking, institutional licensing, and any agreed distribution integrations.

We welcome revised timelines and fees under this structure. Optional retainership may be discussed after a successful delivery definition is agreed.

3. Immediate next steps requested

- Written acknowledgement of Flutter continuity for the member app.
- Revised SOW incorporating Sections 1–2 and Appendix A.
- Updated pricing by workstream (A/B/C), with clear “extend existing” vs “net-new” labels.
- Short technical walkthrough demonstrating familiarity with the current Flutter repository and backend contracts.
- Confirmation of staging/production GitHub CI practices compatible with our existing pipelines.

We value the dialogue and hope to find a path that strengthens monetization and operations without discarding the product surface our users already depend on.

Sincerely,

LingAfriq

Product & Engineering

APPENDIX A

Current Product Surface (Preserve-and-Extend)

This Appendix forms part of any revised SOW. Features below exist in the LingAfriq production Flutter application and related services unless marked NET-NEW. Vendor must preserve behavior and extend quality unless LingAfriq defers an item in writing.

Domain	In current app	In Prodally SOW	Coverage
Auth, profile, settings, biometrics	Login/signup, verify, biometrics, secure storage, privacy, delete account, dark mode, i18n	Not itemized	**MISSING**
Onboarding & placement	Multiple onboarding flows + placement quiz/test	Implied via personalization only	**PARTIAL**
Curriculum / Authentic Path	Lessons map, A1–C1 authentic path, certificates, bundled CMS, history & mannerisms	Offline packs + cultural/history (high level); admin course mgmt	**PARTIAL**
Grammar / vocab / skill practice	Grammar hub, flashcards, listening/writing, speak missions, tone drills, SRS	Lumped under language tools	**PARTIAL**
Living Dictionary & Phrase DNA	Shipped in app	Named in Module 1	**NAMED (rebuild risk)**
Dialect customization	Dialect preference + variant picker	Named in Module 1	**NAMED (rebuild risk)**
Translation (Polie / Live / Offline)	Multi-path translation stack already live	Real-time translation & dictionary upgrade	**PARTIAL**
Pronunciation / African TTS / STT	African TTS, scoring, tone detection, pitch viz, ASR game scorer	Pronunciation & rhythm coaching	**PARTIAL**
Polie AI tutor (multi-mode)	Translation, Tutor, Roleplay, Vocabulary, Review + hybrid orchestrator	AI chat coach (one line)	**PARTIAL**
Historical personas & missions	26 personas + mission flows + safety/assessment	Not mentioned	**MISSING**
Human tutor marketplace	Not a full booking marketplace today	Discovery, booking, session management	**NET-NEW**
Live classrooms (LiveKit)	Classroom, lobby, notes, queue, roster, assignments	Scheduling & attendance	**NAMED (rebuild risk)**
Practice / conversation rooms	Practice room setup, collaborative LiveKit sessions	Role-play / guided conversation rooms	**PARTIAL**
Games catalog	42 registered game types + Flame/Rive infrastructure	Not mentioned	**MISSING**
Gamification systems	Hearts, quests, seasonal events, magic items, ancestral tree, leagues, tribe wars	Streaks/XP/badges extended; leaderboards; challenges	**PARTIAL**
Villages & Tribes	Hub, maps, market/cafe/elder hut, Tribe vs Tribe, tribal duel	Language Village + My Tribe	**PARTIAL**
Chat (global / tribe / private)	Socket.IO chats, WA-style DM, call history, @Polie, moderation	Global chat + private messaging + reporting	**PARTIAL**
X-style community feed	Home, compose, explore, lists, notifications, profiles	Not mentioned	**MISSING**
Snap + WA status social	Snap inbox/camera/stories; WA status; starred/media	Not mentioned	**MISSING**

Domain	In current app	In Prodally SOW	Coverage
Social audio rooms	Discovery, create, following, moderation, scheduled	Not mentioned	**MISSING**
Micro-mentor + staff reports	Peer mentoring hub/session + staff moderation	Not mentioned	**MISSING**
Offline / sync v2	Hive, Workmanager, selective sync, outbox, conflict resolution, encrypted cache	Offline access & downloadable packs	**PARTIAL**
UGC / import media / native review	UGC hub, create lesson/quiz/story, import media, voice contribution	UGC + imported media named	**NAMED (rebuild risk)**
Culture magazine & FLB heritage	Magazine + FLB heritage archive	Cultural/history/heritage (high level)	**PARTIAL**
Point & Say (ML Kit)	Camera object → speak word	Not mentioned	**MISSING**
Passport credentials	Proctored session + credential screens	Not mentioned	**MISSING**
Subscriptions (mobile)	Tier UI + RevenueCat + family dashboard	Freemium/monetization + admin tier config	**PARTIAL**
Admin & content console	No full CMS admin in Flutter client	Full Module 3 priced	**NET-NEW**
Institutional licensing & telco/CSR	Not productized	Marketed in overview; page 11 may exclude telco/CSR	**NET-NEW / CONTRADICTORY**
Observability & security	Sentry, certificate pinning, telemetry, health checks	Not in build scope	**MISSING**
Client platform / stack	Production Flutter app (Riverpod, LiveKit, Socket.IO, Hive, Firebase)	Frontend Developer (React Native)	**STACK MISMATCH**
Learner Web App	Mobile-first Flutter today	Title says Web & Mobile; only Admin React clearly scoped	**PARTIAL**

Appendix A — Non-exhaustive feature clusters

The matrix above is the coverage control list. For avoidance of doubt, the following clusters are in production and must not be silently dropped:

Learning & curriculum. Onboarding/placement; home/courses; lessons map; Authentic Path; grammar/vocab/listening/writing; conversation scenarios; speak missions; spaced repetition; dialect preference; certificates.

Polie & AI. Mode selection and workspace (Translation, Tutor, Roleplay, Vocabulary, Review); tutor sub-modes; hybrid orchestration; live translate; offline translation; historical personas and persona missions.

Voice & pronunciation. African TTS; STT; pronunciation scoring; tone drills/error detection; synthetic voice styles; voice contribution; game ASR scoring.

Games. Full catalog of forty-two (42) game types spanning skill, cultural, and traditional board/card experiences, plus catalog/router/results infrastructure.

Gamification. Hearts; daily goals/challenges; XP/streaks/badges; quests; seasonal events; magic items; ancestral tree; leaderboards/standings; tribe competitions.

Villages, tribes, classroom. Villages hub and location scenes; tribe membership/discovery; Tribe vs Tribe; LiveKit live classroom and practice rooms.

Social & chat. Global/community/tribe chat; private messaging; call history; X-style feed; Snap flows; WA status; social audio; micro-mentor; moderation tools.

Content & culture. Offline packs/sync; UGC; imported media; native content review; culture magazine; FLB heritage; Point & Say; passport credentials.

Account, payments, platform. Auth/profile/settings/biometrics; RevenueCat subscriptions and family dashboard; Firebase notifications; Sentry; certificate pinning; deep links; localization.

Net-new (welcome if properly priced). Full Admin & Content Console; institutional licensing; tutor/immersion marketplace booking and commission tracking; agreed distribution/telco integrations if explicitly included.

Appendix control statement

If a feature exists in the production app and is not explicitly deferred by LingAfriq in writing, it remains in scope for preserve-and-extend. Discovery may refine UX, but may not remove product pillars without written approval.
